

MARINA KOTOVA

SOFTWARE TESTING ENGINEER

CAREER OVERVIEW

QA in the field of manual testing. I chose this specialty because it's cool when you can influence the quality of the product and thus make it even better.

KEY COMPETENCIES

Test documentation:

- Test- cases;
- Check- lists;
- Bug- report;
- Report on test results;
- Log.

Types of testing:

- Functional testing;
- Non-functional testing;
- Test Design Techniques;
- Mobile testing.

ISTQB certification

Vadim Ksenzov's course

English A2-B1 (courses with a tutor).

WORK SUMMARY

Software Testing Specialist

CJSC "LINEV Research and Innovation Center" | Aug 2021 - present (10 month)

Testing a bundle of several programs for working with medical equipment and screening equipment (security). Checking the software installation on the operator's workstation, checking the visibility of all communication nodes between the device and the software, setting up the software and setting up the device through the program settings and through the settings. Correct launch of the program, registration of the patient (person), checking the setting of the image modes (X-ray feed power and the depth of visibility of internal changes and foreign bodies). Working with settings, changing parameters, collecting logs, working with logs (search for errors during software operation). Testing the interaction of the software with the server part (sending images to the PacsOne server). Working with databases, searching for a patient (person) registered in the program. Conducted non-functional and functional testing, compatibility testing, retesting, regression testing. Writing test documentation (checklist, test case), bug report, at the end of testing a test report is issued.

Testing a web service for creating and managing licenses. Checking the correct operation of user registration (web forms were tested), working with databases (whether a user was created), creating licenses, downloading licenses, downloading this key to the device. Working with Postman (methods GET, POST, DELIT, PUT, PUTCH), Swagger, DevTools.

As well as:

- I write simple scripts to interact with the browser using Selenium WebDriver;
- I find various elements on web pages;
- Working with the Git version control system.

I am proud that in three months I understood the specifics of the operation of medical equipment, as well as the DICOM standard.

QA Engineer (Internship)

EventSource.ca | Dec 2020 - Apr 2021 (5 month)

On this project, she underwent an internship during her studies.

The project helped to understand the very specifics of testing and immediately put it into practice.

The requirements are analyzed, what levels of requirements are.

What and how to develop test documentation.

What types, test methods.

And also mobile testing:

- Types of mobile testing;
- Features of testing mobile applications;
- Tools for testing mobile applications.

MARINA KOTOVA

SOFTWARE TESTING ENGINEER

KEY TOOLS

- PacsOneServer;
- WampServer;
- Orthank;
- Putty;
- Wireshark;
- Redmine;
- TestRail;
- VirtualBox;
- DevTools;
- Postman;
- Database SQL;
- Android Studio (Tools — AVD Manager);
- JSON, XML;
- Trello;
- Git;
- SCRAM.

PERSONAL QUALITIES

I am a friendly girl with a sense of humor and big ambitions.

I am able to work in a team, hardworking and stress-resistant.

I also have experience in sales of mobile equipment.

I am an athlete, I do athletics.
